LifeSpring Capital Purchase: Accessible Vehicle		To expand the transportation services currently offered by LifeSpring through the purchase of a lift-equipped 15 passenger van to provide transportation services to clients. The service our agency will provide with the requested equipment will be transportation services to clients with disabilities, many of which are also elderly, in Jefferson County, Indiana. These clients would not be able to get to our facilities for treatment without the requested vehicle. Being able to provide transportation to our clients enables them to receive needed individual therapy, attend intensive treatment groups, learn daily living skills, and receive the support they need to keep from being institutionalized. The vans are also used for occasional group social outings. All clientele transported by LifeSpring have mental disabilities. Van schedules are structured to accommodate multiple treatment groups each day. LifeSpring immediately begins transportation for new clients, not waiting until the authorization for Medicaid transportation services is received as many other providers must do. Using LifeSpring maintained vehicles eliminates scheduling problems and assures clients of round-trip transportation. Also, LifeSpring's mentally disabled clients will not be "bumped" when other carriers must give priority to those who are physically ill. The van will transport clients to appointments with doctors, the hospital, and other providers. Also, the vans transport clients to other necessary appointments.		1866		LifeSpring
