

Changes in Priorities from Previous Transportation Improvement Program

The Transportation Improvement Program is a schedule of transportation projects for the next five years. Project progress can be altered due to unforeseen circumstances such as project readiness, availability of local match, as well as numerous other reasons. The following tables were developed as a means of monitoring the progress and implementation of projects programmed with STP-Urban and CMAQ funding. Tables 11 and 12 show the change in priorities of the Indiana projects programmed for the use of STP-Urban and CMAQ funds. Table 13 depicts the change in priorities of the Kentucky STP-Urban projects.
