Total Estimated Project Cost:	\$3,708,432		Total Cost Programmed in TIP to date:	\$3,708,432	
Description:	Extension of collector class roadway (Graybrook Lane) from the intersection with Bono Road/Pearl Street to the intersection of State Street. This roadway extension would further establish connections from economically depressed areas to the vital State Street corridor.				
Justification:	Graybrook Lane currently deadends into Pearl Street/Bono Road intersection. By extending Graybrook Lane, the collector class roadway would be extended to an important arterial roadway of State Street which would allow citizens an easier route to connect to shopping, vital services, and transit. Furthermore, this project serves an economically depressed area of the city and would allow better connections for the citizens adjacent to this project.

Total Estimated Project Cost:	\$3,230,000		Total Cost Programmed in TIP to date:	\$2,871,112	
Description:	<p>Improvement of the intersection of East Spring Street (a major arterial and gateway into the community with Beharrell Avenue (a collector class roadway). The concept is to utilize a roundabout, a proven safety counter measure, in order to improve the safety of this intersection, slow traffic entering the City of New Albany, and to enhance the livability and walkability of the surrounding areas of the community. This would also allow for a connection to the Ohio River Greenway, and provide a road diet on Spring Street that will accommodate bicycle facilities, parking, and other amenities for the community which will make this corridor more functional for all citizens and not solely drivers. The cost estimate for these intersection improvements is \$3,230,000.</p>				
Justification:	The City of New Albany is always looking to improve the safety of our roadways and intersections. The current

Total Estimated Project Cost:	\$6,250,000 \$6,375,000		Total Cost Programmed in TIP to date:	\$6,250,000 \$6,375,000	
Description:	The project will install new curb and gutter, sidewalks, and drainage along Progress Way from I-65 to Broadway. The width of the lanes will not change, instead they will be shifted south slightly to allow for drainage improvements.				
Justification:	<p>The Town is seeing significant growth along Progress Way. This includes the addition of Cunningham Campers and a large apartment complex, both near the Addmore Lane Intersection. The area is already well traveled as a bypass around Veteran's Parkway and the additional apartments will increase the traffic on the roadway. There is not a need for capacity, but instead a need to increase safety along the roadway. The road lacks drainage, curbs, gutters and a walking path. These are needed to increase safety along the entire corridor.</p> <p>The area west of Sam Gwin is highly traveled by individuals living in the Senior Housing along Greentree North. They often travel in and cross the roadway in their motorized scooters. This very unsafe and the proposed improvements will give them a place to safely cross and travel.</p>

Total Estimated Project Cost:	\$1,250,000 \$1,350,000		Total Cost Programmed in TIP to date:	\$822,827 \$947,827	
Description:	The existing sidewalks in the Henryville area are crumbling and do not currently meet ADA requirements. Ramps will be added at intersections and slopes will be adjusted to help meet current ADA requirements. Extending sidewalks from the Henryville High School to the local library should also help the community.				
Justification:	Sidewalks in the Henryville area do not currently meet ADA requirements. Improvements to the sidewalks including but not limited to curb ramps, sidewalk ramps and other improvements as well as extending the sidewalks to the Henryville School are planned for this project.

Total Estimated Project Cost:	\$40,150		Total Cost Programmed in TIP to date:	\$40,150	
Description:	Installation of safety curb on S. Penn Avenue, 230' North of US 31. Project continues for 405' North along the East side of Penn Avenue . Project ends 635' North of US 31.				
Justification:	Due to age of road and repaving over the years, Penn Ave has 8-12 inched of drop off at edge of pavement then into a ditch along railroad. Project will improve safety along roadway as drivers exit US31 on to Penn Ave.

Total Estimated Project Cost:	\$150,000		Total Cost Programmed in TIP to date:	\$150,000	
Description:	Installation of lighting along Camp Run Parkway and American Way.				
Justification:	Camp Run Pkwy and American Way are new roadways within the Town of Sellersburg. They are currently unlit and receive extensive use by vehicle traffic as well as walkers. Lighting will improve overall safety of the area.

Total Estimated Project Cost:	\$327,500		Total Cost Programmed in TIP to date:	\$327,500	
Description:	The City intends to install a High Intensity Activated Crosswalk on Allison Lane at Wooded Way, in front of the Jeffersonville High School				
Justification:	The purpose of this project is to install a High-intensity Activated crosswalk (HAWK) signal at the crosswalk in front of Jeffersonville High School on Allison Lane at Wooded Way. The need for this project is very high, due to this being a very busy crosswalk for pedestrians including student pedestrians, especially before and after school.

Total Estimated Project Cost:	\$55,600		Total Cost Programmed in TIP to date:	\$55,600	
Description:	The city intends to install centerline rumble strips along Utica Pike from Main Street to Loop Road				
Justification:	Utica Pike is a long stretch of roadway with heavy two- way traffic. There are very few controlled intersections and a very high risk of head-on collisions due to the length, speed, and heavy two-way, two-lane traffic flow on this roadway. With the installation of rumble strips along the centerline of the roadway, this will be an early indication for drivers potentially crossing over the centerline to correct and avoid serious head-on collisions with other motorists.

Total Estimated Project Cost:	\$28,548,000		Total Cost Programmed in TIP to date:	\$28,548,000	
Description:	<p>This project will transform 9th Street/Roy Wilkins Avenue just west of the downtown Louisville from the Main Street to Broadway from a six-lane thoroughfare with extremely wide right-of-way into a "Complete Street." Improvements to be considered during the Design process include: Reduce the number and width of lanes, convert one-way traffic to two-way (with a two-way left turn lane) on Muhammad Ali Boulevard and Chestnut Street/River Park Drive, eliminate negative offset left-turn lanes, adequately dimensioned turn bays, traffic signal upgrades, expanded fiber throughout the corridor, protected/permissive left turns at signals, sidewalk expanded up to 20-feet wide, curb extensions, pedestrian refuge islands, pedestrian scale lighting, crosswalk visibility enhancements, tabled intersections, protected bike lanes, improved signage, bus shelters, kiosks with real-time bus information, dedicated bus lanes, bus bulbs, increased tree canopy, bioswales, and improved storm drainage.</p>				
Justification:	<p>Eliminate the physical and psychological barrier that the "9th Street divide" creates between Louisville's Central Business District and the West End neighborhoods; create a safe and accessible travel experience for all users including pedestrians, cyclists and transit riders; increase economic vitality through creating a safe, attractive and comfortable environment; provide opportunities for parks and open spaces, playgrounds, recreation access, street tree canopy and storm water management features; and provide a safe and efficient corridor for vehicle and freight travel.</p>

Description:	<p>Widen I-71 from four to six lanes from KY 329 (MP 14.1) to KY 393 (MP 18.0). (16CCN). Project length is 3.9 miles. CHAF DESC: Widen I-71 from four to six lanes from KY 329 (MP 14.1) to KY 393 (MP 18.0). (16CCN) CHAF ID: IP20160192. Additional Considerations: Widen I-71 from 4 to 6 lanes from KY 329 to KY 393.</p>				
Justification:	<p>The Purpose of the I-71 widening and reconstruction is to address the capacity deficiencies and operational issues that currently characterize the existing corridor and provide increased efficiency and safety for the traveling public. It will serve through traffic on I-71, as well as local users traveling to and from the Louisville Metro and Crestwood/Buckner areas.</p> <p>CHAF Need: The Needs being addressed by the proposed I-71 project are based on the following facts: Increasing traffic volumes have resulted in traffic congestion and poor traffic flow characteristics. In 2009, the Average Daily Traffic was near 56,600 vehicles per day (vpd). In 2015, the traffic volume has increased to approx. 61,900 vpd. By 2040, those numbers are forecasted to increase to around 80,000 vpd. Traffic projections illustrate continued growth in traffic volumes. This forecast takes into account the recent opening of the East End Bridge from I-265/KY 841 in Kentucky north to I-265 in Indiana.</p> <ul style="list-style-type: none"> • I-71 has roadway deficiencies and poor traffic operational characteristics. The life span of the pavement surface and bridges warrant they be replaced within the foreseeable future, regardless of the transportation demands; the clear zones along with the inside shoulder width are less than desirable. • Driver crash rates are notably high along this section of I-71.increase to around 80,000 vpd.

Justification:	The following needs have been identified for this section of KY 1450, generally as a result of significant commercial and residential growth in the area: 1) To improve capacity, 2) To provide an improved highway that meets current safety design standards, 3) To enhance network connections, 4) To increase freight capacity, 5) To address recent and planned growth.

Description:	Major revision of the intersection located at the Outer Loop, Fegenbush Lane, and Beulah Church Road. Turn lane to be completed by Transportation Cabinet per agreement. (O4CCN)(O8CCR)(1OCCR)(12CCR) CHAF IP20160080.				
Justification:	The primary purpose of the project is to relieve the vehicle delay and improve safety while considering the possible residential, commercial, environmental, and historical impacts of any solution. Currently KY 1065 (Outer Loop), Fegenbush Lane, Beulah Church Road, and Watterson Trail (CR-1005H) converge within 900' of each other. The junction is controlled by two signalized intersections. Both are plagued by excessive vehicle delay during the morning and evening peak periods. The Critical Rate Factor (CRF) for this section of KY 1065 is 1.817 from 2012 to 2016.

Description:	Improve the interchange of I-71 and KY 329. CHAF ID: IP20080244. Additional Consideration: Project will evaluate: signaling SB I-71 on and off ramps; adding left turn lane on KY 329 for left turns onto SB I-71 ramp; multi-use path along KY 329; and various sight distance improvements.				
Justification:	Improve safety and reduce congestion at the I-71/KY 329 interchange. This project is needed because of a high amount of crashes and limited sight distance that exists at the I-71 ramps at KY 329. Additionally, the capacity of KY 329 is inadequate to handle current traffic volumes during peak hours.

Total Estimated Project Cost:	\$20,453,500		Total Cost Programmed in TIP to date:	\$20,453,500	
Description:	<p>Widen KY 245 from Bernheim Forest to the Community College. (08CCN)(10CCR)(14CCR)(16CCR) From Milepoint 4.425 to Milepoint 6.415. CHAF ID IP20150316.</p> <p>Additional Considerations: Four lanes, plus turn bays are assumed from the SB I-65 Ramps to a point approximately 1.7 miles E of the I-65 Interchange.</p>				
Justification:	<p>The purpose of the KY 245 Widening Project is to provide an improved transportation facility to meet the additional traffic demand forecasted to occur and accommodate any existing or future developments, and/or tourist destinations along the corridor. KY 245 leading southward from its interchange with I-65 is the major link between I-65 and the City of Bardstown and the western entrance to the Kentucky Bourbon Trail. The area has significant institutions and tourist destinations near the interchange that attracts local traffic, visitors and travelers along I-65. Among the most important attractions are the Bernheim Arboretum, Jim Beam Distillery, The Boy Scout Camp, Bernheim Middle School and the Bullitt County Fairgrounds which hosts many events during the year. Currently the roadway is a two lane minor rural arterial. Traffic volumes increased from 9,520 ADT in 1991 to 12,800 ADT in 2007 and it is projected to grow to 17,200 ADT in 2034. A proposed Hotel development is planned on the North side of KY 245 next to I-65 interchange, which will increase current volumes. Local officials indicated the need to improve access to local institutions expected to enhance tourism and economic development. The proposed road is expected to provide a safe and efficient facility, help address future traffic demand, and generate an entry way that integrates businesses and natural areas creating a major tourist center.</p>

Description:	Landslide repair on Westport Road (KY-524) from JCT. US-42 West, north 1.0 mile. (2002BOPC) (NOT REQUIRED) (2022CCN) IP20150467				
Justification:	The purpose of this project is to improve safety and reliability of KY 524 (Westport Road) from US 42 to 1/4 miles south of Smith Lane. This project is needed because there has been an ongoing landslide issue on KY 524 (Westport) from US 42 to 1/4 miles south of Smith Lane. Maintenance addresses the problem each year with band-aid approaches including driving pilings, adding new rip rap, and replacing guardrail that slides down the slope but a more permanent fix is needed requiring funding outside of the maintenance budget. Correction of the landslide will maintain the reliability of the network.

Description:	Improve safety and reduce congestion on I-265 from US 31E (Bardstown Road) to KY 155 (Taylorsville Road). CHAF ID: IP20150080. Additional Considerations: Project will evaluate widening to the inside from 4 to 6 lanes.				
Justification:	Improve safety and reduce congestion on I-265 (Gene Snyder Freeway) from US 31E (Bardstown Road) to KY 155 (Taylorsville Road). This project is needed because of deficient ramps and inadequate capacity on I-265 (Gene Snyder Freeway) from US 31E (Bardstown Road) to KY 155 (Taylorsville Road). The I-265 Study completed in January of 2015 cites an existing LOS D along this section.

Description:	Eastwood Fisherville Connector to I-64 (18CCN) (2020CCR). Project will consider a new interchange and connector road from KY 148 to US 60 (Shelbyville Road) with a new interchange on the I-64 corridor. Interchange would be in the vicinity of Gilliland Road.				
Justification:	Reduce congestion and improve connectivity to I-64 in eastern Jefferson County between I-265 (Gene Snyder Freeway) in Jefferson County to KY 1848 (Buck Creek Road) in Shelby County. This project is needed because in light of existing and anticipated growth, local and regional access via the interstate system and local roadway network is needed due to their being a distance of 9 miles between access to I-64 from I-265 (Gene Snyder Freeway) in Jefferson County to KY 1848 (Buck Creek Road) in Shelby County. Limited access to I-64 has contributed to ever increasing traffic volumes on US 60 and KY 155/KY 148.

Description:	Improve safety, mobility for all modes, and provide better access along KY 155 from KY 148 to I-265 near Pope Lick Park. Project may consider widening up to 4 travel lanes with a two-way center turn lane and consider bicycle and pedestrian facilities. CHAF ID: IP20080202. Formerly described as: Widen Taylorsville Road to 3 lanes from I-265 to KY 148. (18CCN).				
Justification:	Improve safety, mobility for all modes, and provide better access along KY 155 from KY 148 to I-265 near Pope Lick Park. The Critical Rate Factor for this section of KY 155 is 1.192 for the years 2012 to 2016. The KIPDA MPO TAZ data shows a 1.6% projected future population and employment growth in the project area. Description:	Three lane widening along KY 1931 from the Doss High School entrance to Palatka Road, including intersection improvements with Palatka Road and turn lanes.				
Justification:	Improve safety and local traffic operations along KY 1931 (Saint Andrews Church Road) between Doss High School/Trunnell Elementary and KY 1142 (Palatka Road). This project is needed because KY 1931 (Saint Andrews Church Road) between Doss High School/Trunnell Elementary and KY 1142 (Palatka Road) experiences frequent congestion during peak hours and needs significant improvements in safety and local traffic operations. There are above average crash rates, substandard geometric features, and traffic is expected to continue to increase along this stretch of roadway.

Improve safety and reduce congestion on I-71 from I-64 near the Kennedy interchange to Zorn Avenue.</p> <p>CHAF Need: This project is needed because of a higher than average crash rate, inadequate current and future capacity, and roadway deficiencies on I-71 from I-64 near the Kennedy interchange to Zorn Avenue. The critical crash rate factor (CCRF) in this 2 mile section is 2.791 as analyzed in the I-71 Study. The percentage truck traffic is 7% with multiple major traffic and freight generators as noted in the I-71 Study. The 2038 anticipated truck percent growth rate is 2.8%. This section of I-71 has a LOS F and volume to capacity ratio of 1.02. Shoulder width deficiencies and functionally obsolete culverts also exist within these milepoints.</p>

Description:	Railroad crossing safety project on KY 329 in Crestwood.				
Justification:	Existing KY 329 (Railroad Avenue) crosses CSX Railroad just north of the intersection with KY 146 in Crestwood. The geometry of the rail crossing causes tractor-trailers and other long wheelbase vehicle to become hung-up and stranded on the active railroad facility. Vehicles must be removed with assistance from an emergency recovery vehicle. CSX records showed at least 170 unique incidents where trucks became stuck at the KY 329 crossing between January 2016 and January 2021. Various options to alleviate the situation will be explored in the project design process.

Total Estimated Project Cost:	\$76,350,000		Total Cost Programmed in TIP to date:	\$4,250,000	
Description:	<p>KYTC Highway Plan (June, 2018): Improve safety and reduce congestion on I-265 from I-65 to US 31E. CHAF ID: IP20080191. Additional Considerations: Project will evaluate widening to the inside from 4 to 6 lanes.</p>				
Justification:	<p>CHAF Purpose: Improve safety and reduce congestion on I-265 (Gene Snyder Freeway) from I-65 to US 31E (Bardstown Road).</p> <p>CHAF Need: This project is needed because of deficient ramps, inadequate capacity, and higher than average crash rates on I-265 (Gene Snyder Freeway) from I-65 to US 31E (Bardstown Road). As cited in the I-265 Study of January 2015 the projected 2020 LOS along this section of I-265 is D with 2 smaller sections having LOS E and F in the PM peak, and the 2020 average PM peak v/c ratio is 0.84. The 2014 rear end crash rate from I-65 to KY 61 exceeds the average rate for the road type according to the most recent I-265 Study. 2014 ramp deficiencies include the merge lengths from Smyrna Parkway to I-265 WB and EB. Two bridges in this section are identified as functionally obsolete. The surrounding land uses are residential, commercial, and industrial. Commuters use this segment to bypass I-65 as well as gain access to I-65. Adequacy rating data point to high levels of congestion and rough pavement conditions in some areas. There is additional growth occurring now and planned for the future in this area in Jefferson County which will only worsen congestion.</p>

Justification:	Improve safety, reduce congestion, and improve multi-modal transportation options along KY 61 from Commerce Crossings Drive to Briden Avenue including the I-264 (Watterson Expressway) and I-265 (Gene Snyder Freeway) interchanges. The KY 61 corridor from Commerce Crossings Drive to Briden Avenue had four roadway segments ranked in the top 41 of the highest roadway crash segments in the KIPDA MPO area for Kentucky (Bullitt, Jefferson, and Oldham Counties). This analysis was based upon crash data for the years of 2009-2011. KY 61 from Blue Lick Road to Outer Loop was ranked 13th with an average daily traffic (ADT) of 31,500 and crash rate of 10.6 (crashes per million vehicle miles traveled). KY 61 from Fern Valley Road to East Indian Trail was ranked 19th with an ADT of 28,100 and crash rate of 6.7. KY 61 from Gilmore Lane to Grade Lane was ranked 39th with an ADT of 27,300 and crash rate of 5.3. KY 61 from Outer Loop to McCawley Road was ranked 41st with an ADT of 24,500 and crash rate of 7.5.

Description:	Improve safety and reduce congestion at the I-65/I-265 (Gene Snyder Freeway) interchange. CHAF IP20160019.				
Justification:	<p>The Purpose of the I-65/I-265 interchange project is to reduce congestion and improve safety. The 2015 I-265 Programming Study has projected the I-265 westbound to I-65 northbound diverge as operating at a level of service (LOS) of F in both the AM and PM peaks in the year 2020. The study also identifies the I-65 to I-265 eastbound merge as operating at a LOS of D in the AM and F in the PM peaks in the year 2020. The I-65/I-265 interchange was ranked as the 5th highest crash interchange in the KIPDA MPO area for Kentucky (Bullitt, Jefferson, and Oldham Counties). This analysis was based upon crash data for the years of 2009-2011. In that time period there were 347 total crashes within the interchange (meaning the area between the exit and entrance ramps in all directions) which included two fatalities and 5 injuries. The average daily traffic entering this interchange is 181,545 with a crash rate of 1.746 (the ratio of the number of crashes to the number of vehicles entering an interchange) and severity index of 1.071.</p>
